

RAPID INTERVENTION VEHICLE

TIMAK's Rapid Intervention Vehicles (RIVs) are compact, fast-response units designed for high-risk zones where speed is critical.

Equipped with water and foam systems, high-pressure pumps, and rescue gear on an agile 4x4 chassis, they provide quick and effective emergency support.

TECHNICAL SPECIFICATIONS

Standard Specifications

Chassis Options: Ford Ranger, Toyota Hilux, Mitsubishi L200, Isuzu D-Max etc.

Superstructure:

- Aluminum body with LED-lit side compartments.
- Rear roller shutters with locking system.
